DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 14-16, 19-22, 26-27, are drawn to Group I, classified in class 705, subclass 36, and are drawn to an invention pertaining to receiving an expected return and using a discount value wherein calculating is performed using said discount value.

II. Claims 17-18, drawn to Group II, classified in class 705, subclass 36, and are drawn to a non-statutory computer algorithm

III. Claims 23, 28, drawn to Group III, classified in class 705, subclass 36, and are drawn to an invention that calculates market values according to an expected return.

IV. Claims 24, 29, drawn to Group IV, classified in class 705, subclass 36, and are drawn to an invention that determines an amount for investment as a portion of the value of an asset, and calculates a market value using the portion of the value of the asset.

V. Claims 25, and 30, drawn to Group V, classified in class 705, subclass 36, and are drawn to an invention that calculates a market value that would yield the preferred amount for

investment as a return, and calculates market values using the preferred amount and the preferred term.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The separate utilities are specified above, See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
